

LTER NETWORK INFORMATION SYSTEM REPORT

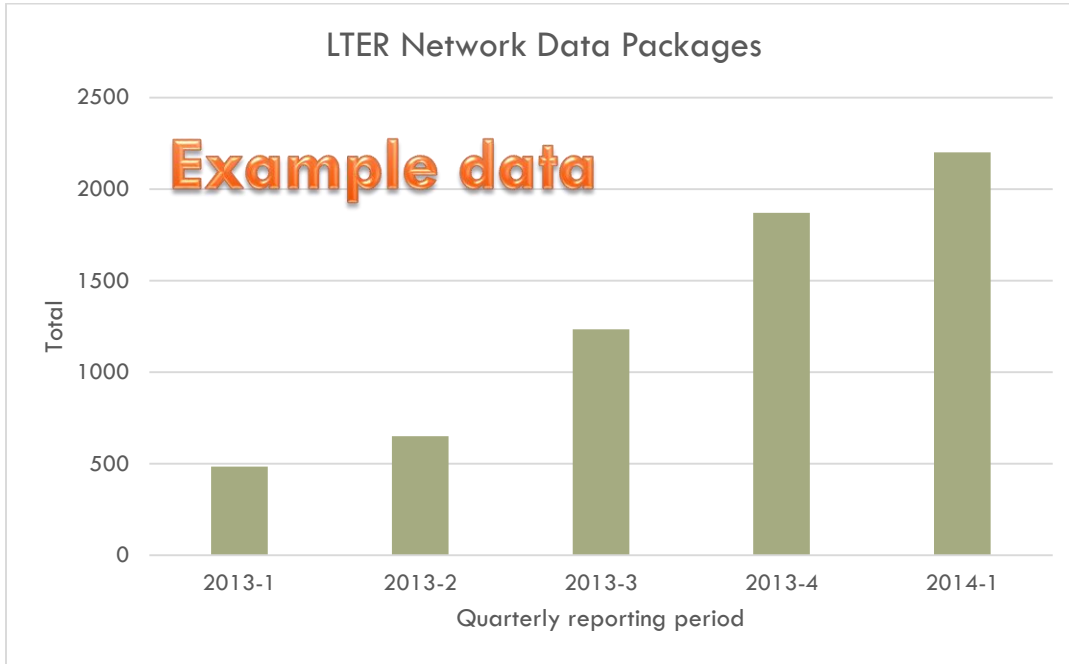

4/15/2014

LTER Network

This report describes the current status of the data package inventory as published in the LTER network information system. It is produced to highlight the volume of public access data produced by the LTER network of research sites. This report is intended for the LTER Executive Board, National Science Foundation program officers, and other interested parties.

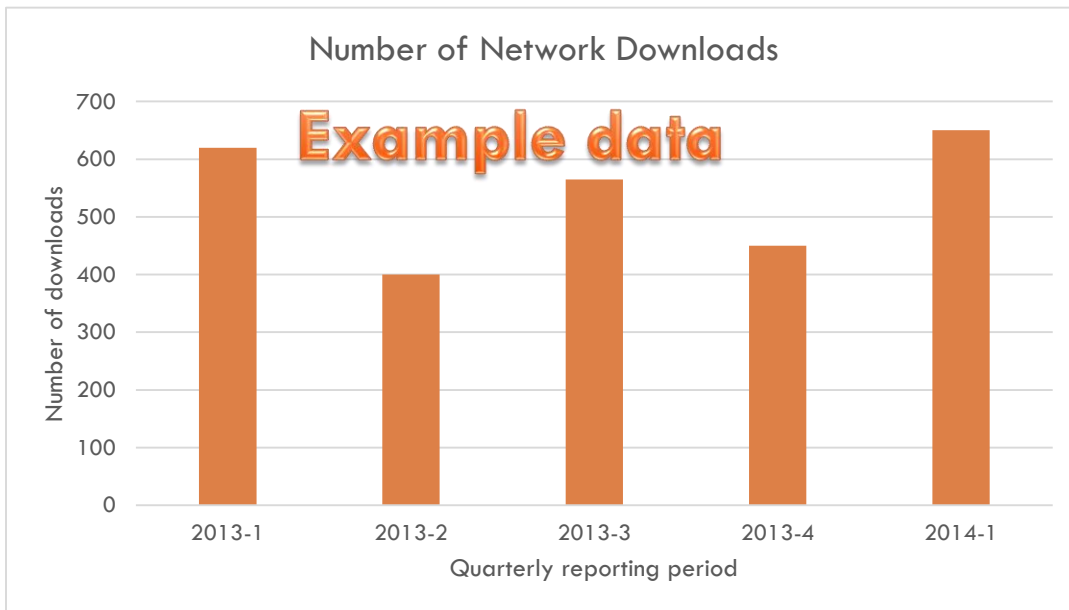

TOTAL NUMBER OF DATA PACKAGES IN NETWORK INFORMATION SYSTEM

This report reflects the total number of data packages published by LTER sites in the network information system. It includes the total by quarter.

NUMBER OF DATA PACKAGE DOWNLOADS

This graphic reflects the number of data package downloads from the LTER network information system by quarter.

NETWORK SUMMARY STATISTICS

	Current Period	Last Period	A Year ago	Last 12 Months
Number of data packages published	24	23	22	91
Total number of published data packages	4203	3760	910	n/a
Number of data package updates/revisions	25	29	17	99
Total number of records (or kilobyte or other indication of size)	11877	10760	7259	n/a

SELECTION OF RECENTLY PUBLISHED DATASETS (LAST THREE MONTHS)

This table presents a random selection of data packages published during the current reporting period. It is intended to provide a flavor of the type of research data being made accessible through the LTER Network Information System.
